

FSDO 19 and the South Florida FAASTeam presents:

I-Pad use in the Cockpit

This WING seminar is designed to help the VFR and IFR rated pilot to safely conduct operations in the National Airspace System while using an I-pad, or similar tablet device, with the latest version of "Fore-flight" navigator software. Emphasis will be placed upon complying with 14.CFR 91.103

The distinctions between TSO'd GPS navigators, hand held portable GPS devices and tablets will also be covered. Key topics will include - how to legally obtain a weather briefing using your tablet, adequate backup, paper charts verses typical tablet navigators such as "Fore-flight", "Wing-X" and "Garmin Pilot". VFR charts, VFR flight planning, Airspace recognition, Terminal Area Transit and Visual Waypoints for GPS navigation will be covered. IFR low and high altitude routing and flight planning, TERPS procedures, including automatic loading of DP's Stars, and airways will be covered. Flying approaches using your I-Pad as your primary source of approach plates and the pitfalls to avoid. Integrating ADS-B traffic and weather data into your I-pad will also be demonstrated using the latest Stratus-II technology.

Directions: Follow attached map to Broward College Campus then proceed to Summer Breeze Cafe
